

# INTEGRA

YOUR GLASS COCKPIT SOLUTION

# THE TWIN IS WIN!

# TL ELEKTRONIC Inc.

Intended for Twin-engines aircraft is offered double gauge two-arrow feature allowing you to have information from both engines on one screen.

The gathering information from the engines and its sensors can be directly into the module installed in the engine compartment where data are shared via two-wires iFamily® BUS.

We are the first manufacturer in the world, who has been offered since 2012 this features for Amphibian aircrafts around the world for the rapidly growing amphibian market.

Enjoy new dual gauge features:

Two arrows for both engines

Dual gauge for both engines

Two digits for both engines

The Twin-Engine feature is an option under further conditions. Please contact us, whether you want to use it.

**MAKES YOUR FLYING SAFER**
